*Structured Managed Services  
Alleviating more headaches than Aspirin.*

"I would recommend Structured Managed Services to any company looking to be more efficient in managing their IT infrastructure." -- Janna Allison, Administrator, Rose City Transportation

"We appreciate the customer service and expertise we get with [Structured] Managed Services. Not only do they keep our network up and running, they keep us informed on the never-ending changes in technology and how it will affect our system." -- Debbie Miner, President, Viking Automatic Sprinkler Company

# TRANSFORM YOUR BUSINESS

Let Structured Monitor, Protect & Manage 24x7x365

## Managed Security

Maximize your security posture from the core to the edge with managed security from Structured. Offload intricate, resource-intensive firewall and endpoint management to our team of information security analysts who are trained to detect and counter today's advanced threats. Our 24x7x365 security services help ensure uptime, asset availability and information accuracy for everyone in your organization. In addition to identifying and mitigating vulnerabilities, Structured's managed security services boost your regulatory compliance processes. Our standard reporting helps you meet rigid thresholds imposed by federal law for PCI, HIPAA, GLBA and many more.

### Key Features

- 24x7x365 availability, service & device health alerting/monitoring
- Resource management & capacity planning
- Incident response
- Monthly health & incident reports

## Managed NOC

As infrastructure grows, visibility shrinks. Knowing what devices sit on your network is tough, but understanding and mapping interconnectivity is truly daunting. When problems arise in today's complicated networks, it is hard to effectively diagnose and address root cause - always costly in terms of lost time and hard dollars. Simplify. Let Structured's managed NOC service take on the difficult work of infrastructure monitoring and management of your private or hybrid environment. Leverage our investment in the industry's best monitoring platforms to regain control and once again meet performance goals and end-user expectations. Redirect your team's attention and energy to neglected mission-critical projects.

### Key Features

- 24x7x365 availability, service & device health alerting/monitoring
- IT dependency mapping
- Asset discovery
- Customizable dashboards

## Managed Cloud

Cloud computing models and managed service providers may not seem like natural allies, but Structured's managed cloud services can perfectly enhance your organization's cloud strategy. Structured is a platform-agnostic multi-cloud services provider, able to help customers assess and execute a public, private or hybrid strategy based on business goals. Take advantage of our cloud assessment and workload placement expertise to maximize efficiency, strengthen information security and ensure ease of use for end users. Tailor your technology without wasting prior investments by enlisting Structured to analyze and broker the right benefits for your organization. Too many companies blindly adopted a cloud strategy and regretted that action. Let us help you chart the right course.

### Key Features

- Resource planning
- Cloud assessment and service analysis
- Workload placement analysis
- Predictable financial modeling
